

Number of cells per clone

There are 1999 clones. On average, they have 1.86 unique cloneIDs, with a median of 2.0 and interquartile range of 1.0 - 2.0. 761 clones have a single unique cloneID.

There are 10290 cells in the end. On average, they have 1.24 unique cloneIDs, with a median of 1.0 and interquartile range of 1.0 - 1.0. 8357 cells have only a single unique cloneID.

There are 111012 viral cloneID molecules. On average, they have 3.84 reads, with a median of 3.0 and interquartile range of 2.0 - 5.0. 24755 molecules have only a single read.

Nucleotides Read per Molecule

There are 111012 molecules. 71868 have been read completely, which accounts for 64.7%

There are 106656 molecules. 94289 have been read completely, which accounts for 88.4%

There are 84130 viral cloneID molecules. 80300 have been read completely, which accounts for 95.4%

There are 75320 viral cloneID molecules. 73461 have been read completely, which accounts for 97.5%

Hamming Distance between all cloneIDs in the Dataset

cloneID Molecules per Cell

Molecules

There are 14437 molecules. On average, there are 7.69 molecules per cell, with a median of 5.0 and interquartile range of 3.0 - 10.0

Corrected Molecules

There are 14364 molecules. On average, there are 7.43 molecules per cell, with a median of 5.0 and interquartile range of 3.0 - 10.0

Cells

There are 12917 molecules. On average, there are 6.51 molecules per cell, with a median of 5.0 and interquartile range of 2.0 - 8.0

Filtered Cells

There are 10290 molecules. On average, there are 7.32 molecules per cell, with a median of 5.0 and interquartile range of 3.0 - 9.0

cloneID Molecules per Unique cloneID in Dataset

Molecules

There are 8400 unique cloneIDs. On average, there are 13.22 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 3.0. 4684 are cloneIDs with single molecules.

Corrected Molecules

There are 3059 unique cloneIDs. On average, there are 34.87 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 3.0. 1718 are cloneIDs with single molecules.

Cells

There are 2245 unique cloneIDs. On average, there are 37.47 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 3.0. 1280 are cloneIDs with single molecules.

Filtered Cells

There are 1390 unique cloneIDs. On average, there are 54.19 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 3.0. 835 are cloneIDs with single molecules.

Unique cloneIDs per Cell

There are 14437 cells. On average, they have 3.98 unique cloneIDs per cell, with a median of 3.0 and interquartile range of 2.0 - 5.0. 2481 cells have a single unique cloneID.

There are 14364 cells. On average, they have 1.94 unique cloneIDs per cell, with a median of 2.0 and interquartile range of 1.0 - 2.0. 6533 cells have a single unique cloneID.

There are 12917 cells. On average, they have 1.67 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 2.0. 7403 cells have a single unique cloneID.

There are 10290 cells. On average, they have 1.24 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 1.0. 8357 cells have a single unique cloneID.
