

Number of cells per clone

There are 1658 clones. On average, they have 2.39 cells, with a median of 1.0 and interquartile range of 1.0 - 2.0. 1026 clones have a single cell.

Number of unique cloneIDs per clone

There are 1658 clones. On average, they have 1.28 unique cloneIDs, with a median of 1.0 and interquartile range of 1.0 - 1.0. 1247 clones have a single unique cloneID.

Number of unique cloneIDs per cell

There are 3959 cells in the end. On average, they have 1.16 unique cloneIDs, with a median of 1.0 and interquartile range of 1.0 - 1.0. 3368 cells have only a single unique cloneID.

Jaccard Similarity between cells Histogram

Number of reads per molecule

There are 75856 viral cloneID molecules. On average, they have 2.07 reads, with a median of 2.0 and interquartile range of 1.0 - 3.0. 35460 molecules have only a single read.

Nucleotides Read per Molecule

There are 75856 molecules. 43533 have been read completely, which accounts for 57.4%

There are 70616 molecules. 67513 have been read completely, which accounts for 95.6%

There are 59065 viral cloneID molecules. 57767 have been read completely, which accounts for 97.8%

There are 58400 viral cloneID molecules. 57360 have been read completely, which accounts for 98.2%

Hamming Distance between all cloneIDs in the Dataset

cloneID Molecules per Cell

Molecules

There are 4953 molecules. On average, there are 15.32 molecules per cell, with a median of 10.0 and interquartile range of 5.0 - 19.0

Corrected Molecules

There are 4930 molecules. On average, there are 14.32 molecules per cell, with a median of 9.0 and interquartile range of 4.0 - 18.0

Cells

There are 4261 molecules. On average, there are 13.86 molecules per cell, with a median of 9.0 and interquartile range of 4.0 - 17.0

Filtered Cells

There are 3959 molecules. On average, there are 14.75 molecules per cell, with a median of 9.0 and interquartile range of 5.0 - 18.0

cloneID Molecules per Unique cloneID in Dataset

Molecules

There are 19381 unique cloneIDs. On average, there are 3.91 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 2.0. 12955 are cloneIDs with single molecules.

Corrected Molecules

There are 2761 unique cloneIDs. On average, there are 25.58 molecules per unique cloneID, with a median of 5.0 and interquartile range of 1.0 - 22.0. 838 are cloneIDs with single molecules.

Cells

There are 1992 unique cloneIDs. On average, there are 29.65 molecules per unique cloneID, with a median of 7.0 and interquartile range of 2.0 - 25.0. 466 are cloneIDs with single molecules.

Filtered Cells

There are 1702 unique cloneIDs. On average, there are 34.31 molecules per unique cloneID, with a median of 10.0 and interquartile range of 3.0 - 31.0. 194 are cloneIDs with single molecules.

Unique cloneIDs per Cell

There are 4953 cells. On average, they have 7.08 unique cloneIDs per cell, with a median of 5.0 and interquartile range of 3.0 - 9.0. 529 cells have a single unique cloneID.

There are 4930 cells. On average, they have 1.45 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 2.0. 3272 cells have a single unique cloneID.

There are 4261 cells. On average, they have 1.24 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 1.0. 3390 cells have a single unique cloneID.

There are 3959 cells. On average, they have 1.16 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 1.0. 3368 cells have a single unique cloneID.
