

Number of cells per clone

There are 3421 clones. On average, they have 4.94 cells, with a median of 1.0 and interquartile range of 1.0 - 2.0. 2488 clones have a single cell.

Number of unique cloneIDs per clone

There are 3421 clones. On average, they have 1.55 unique cloneIDs, with a median of 1.0 and interquartile range of 1.0 - 2.0. 1883 clones have a single unique cloneID.

Number of unique cloneIDs per cell

There are 16906 cells in the end. On average, they have 1.18 unique cloneIDs, with a median of 1.0 and interquartile range of 1.0 - 1.0. 14343 cells have only a single unique cloneID.

There are 274860 viral cloneID molecules. On average, they have 3.24 reads, with a median of 3.0 and interquartile range of 1.0 - 4.0. 76212 molecules have only a single read.

Nucleotides Read per Molecule

There are 274860 molecules. 176616 have been read completely, which accounts for 64.3%

There are 261136 molecules. 251557 have been read completely, which accounts for 96.3%

There are 234353 viral cloneID molecules. 228754 have been read completely, which accounts for 97.6%

There are 228686 viral cloneID molecules. 224559 have been read completely, which accounts for 98.2%

cloneID Molecules per Cell

Molecules

There are 20313 molecules. On average, there are 13.53 molecules per cell, with a median of 9.0 and interquartile range of 4.0 - 18.0

Corrected Molecules

There are 20232 molecules. On average, there are 12.91 molecules per cell, with a median of 9.0 and interquartile range of 4.0 - 17.0

Cells

There are 18660 molecules. On average, there are 12.56 molecules per cell, with a median of 8.0 and interquartile range of 4.0 - 17.0

Filtered Cells

There are 16906 molecules. On average, there are 13.53 molecules per cell, with a median of 9.0 and interquartile range of 5.0 - 18.0

cloneID Molecules per Unique cloneID in Dataset

Molecules

There are 31950 unique cloneIDs. On average, there are 8.60 molecules per unique cloneID, with a median of 1.0 and interquartile range of 1.0 - 3.0. 18088 are cloneIDs with single molecules.

Corrected Molecules

There are 5351 unique cloneIDs. On average, there are 48.80 molecules per unique cloneID, with a median of 2.0 and interquartile range of 1.0 - 8.0. 2647 are cloneIDs with single molecules.

Cells

There are 3980 unique cloneIDs. On average, there are 58.88 molecules per unique cloneID, with a median of 2.0 and interquartile range of 1.0 - 11.0. 1876 are cloneIDs with single molecules.

Filtered Cells

There are 3049 unique cloneIDs. On average, there are 75.00 molecules per unique cloneID, with a median of 3.0 and interquartile range of 1.0 - 22.0. 1188 are cloneIDs with single molecules.

Unique cloneIDs per Cell

There are 20313 cells. On average, they have 5.91 unique cloneIDs per cell, with a median of 4.0 and interquartile range of 2.0 - 8.0. 2416 cells have a single unique cloneID.

There are 20232 cells. On average, they have 1.54 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 2.0. 12219 cells have a single unique cloneID.

There are 18660 cells. On average, they have 1.38 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 2.0. 13169 cells have a single unique cloneID.

There are 16906 cells. On average, they have 1.18 unique cloneIDs per cell, with a median of 1.0 and interquartile range of 1.0 - 1.0. 14343 cells have a single unique cloneID.
